

Sysfilter for InDesign IDML

Quick Start

These instructions will enable to you to use Sysfilter for Indesign within 5 minutes. Enjoy Sysfilter for Indesign!

1. Installation

Execute the download file and follow the instructions on the screen.

2. Test Software

After installation and start of Sysfilter, a welcome screen will be displayed. In the welcome screen click on “Test Software”. You will get to the main view.

3. Transfer Texts / Export Texts

Search for the appropriate directory where your Indesign **IDML** files are stored. To do this, use the File Explorer on the left side. The Indesign files will be automatically displayed in the file list.

Select the **IDML** file in the file list and click on “Export text”.

➔ A DOC file is being generated. The texts in the DOC file can now be translated or edited optionally.

4. Transfer Texts / Import Texts

In the main view click on the tab “Import”. The file list now displays DOC files. The Indesign **IDML** file must be located in the same directory like the DOC file.

Click on “Import text”. The import job will be started.

➔ The InDesign **IDML** files contain the translated text.

There are other options for transferring the texts. These options can be used analogously to the method described.

For further information please read the software manual. 😊
